Manila visits, 2024

What is in this file

289 dated visits from Jan 04, 2024 to Dec 23, 2024 (January–December). Source: raw-2024.xlsx. One row is one logged visit. Repeat accounts are counted once per visit, not collapsed to one client.

Fields that were blank

105 visits have no classified workflow. 29 visits have no classified solution topic. 203 visits have no challenge note, and 31 challenge notes matched no theme. 24 visits have no country. Those rows stay in the visit total and are omitted from the theme charts.

How to read the charts

Demonstration type, country, region, role, and product charts count each visit once. Workflow, solution, and challenge charts can count a visit in more than one bar. The companion CSV lists every category.

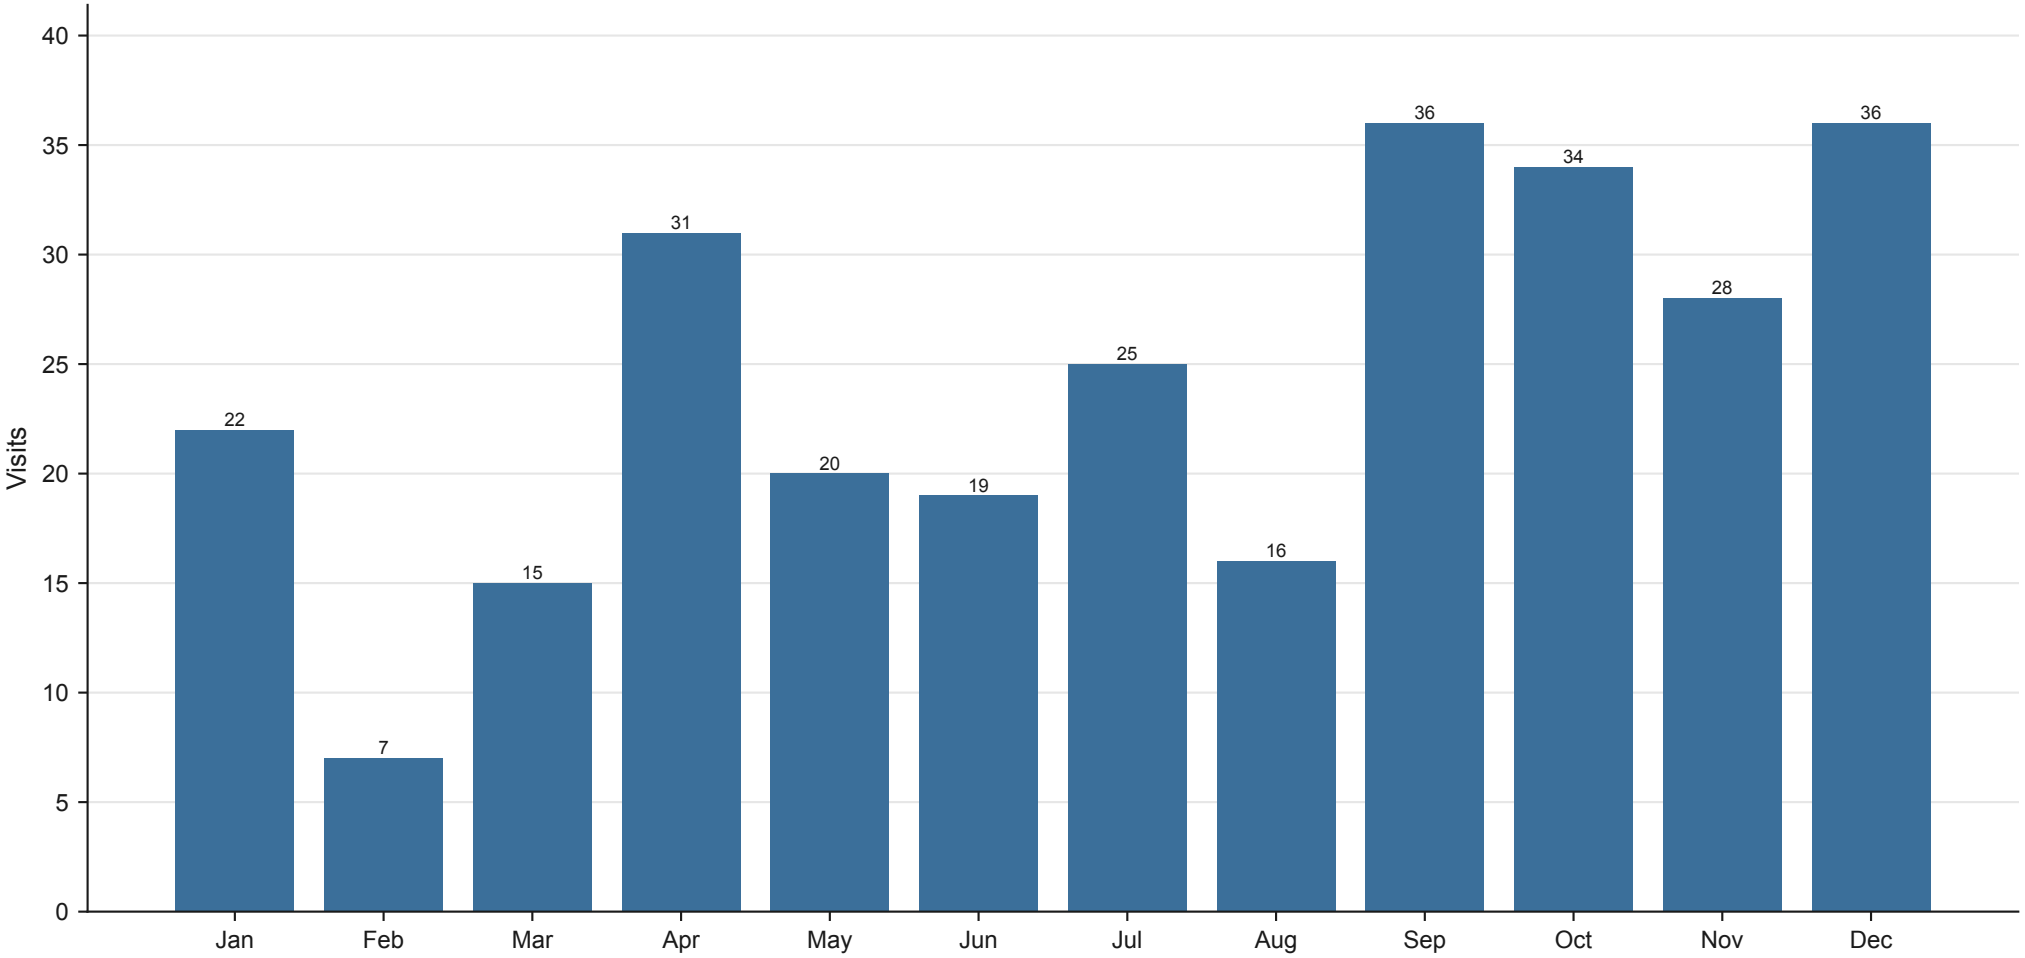

How Manila can use this file

Staff the months clients already request a demo, train associates on the modules on the solution page, including AI Tools, and send someone back to accounts that have already booked.

MNL VISITS

Monthly visits — when to roster more associates

Each column is a month with at least one logged demo. The busiest month is 2024-12 (36 visits, 12%). A missing month was not in this file.

IMPLICATION

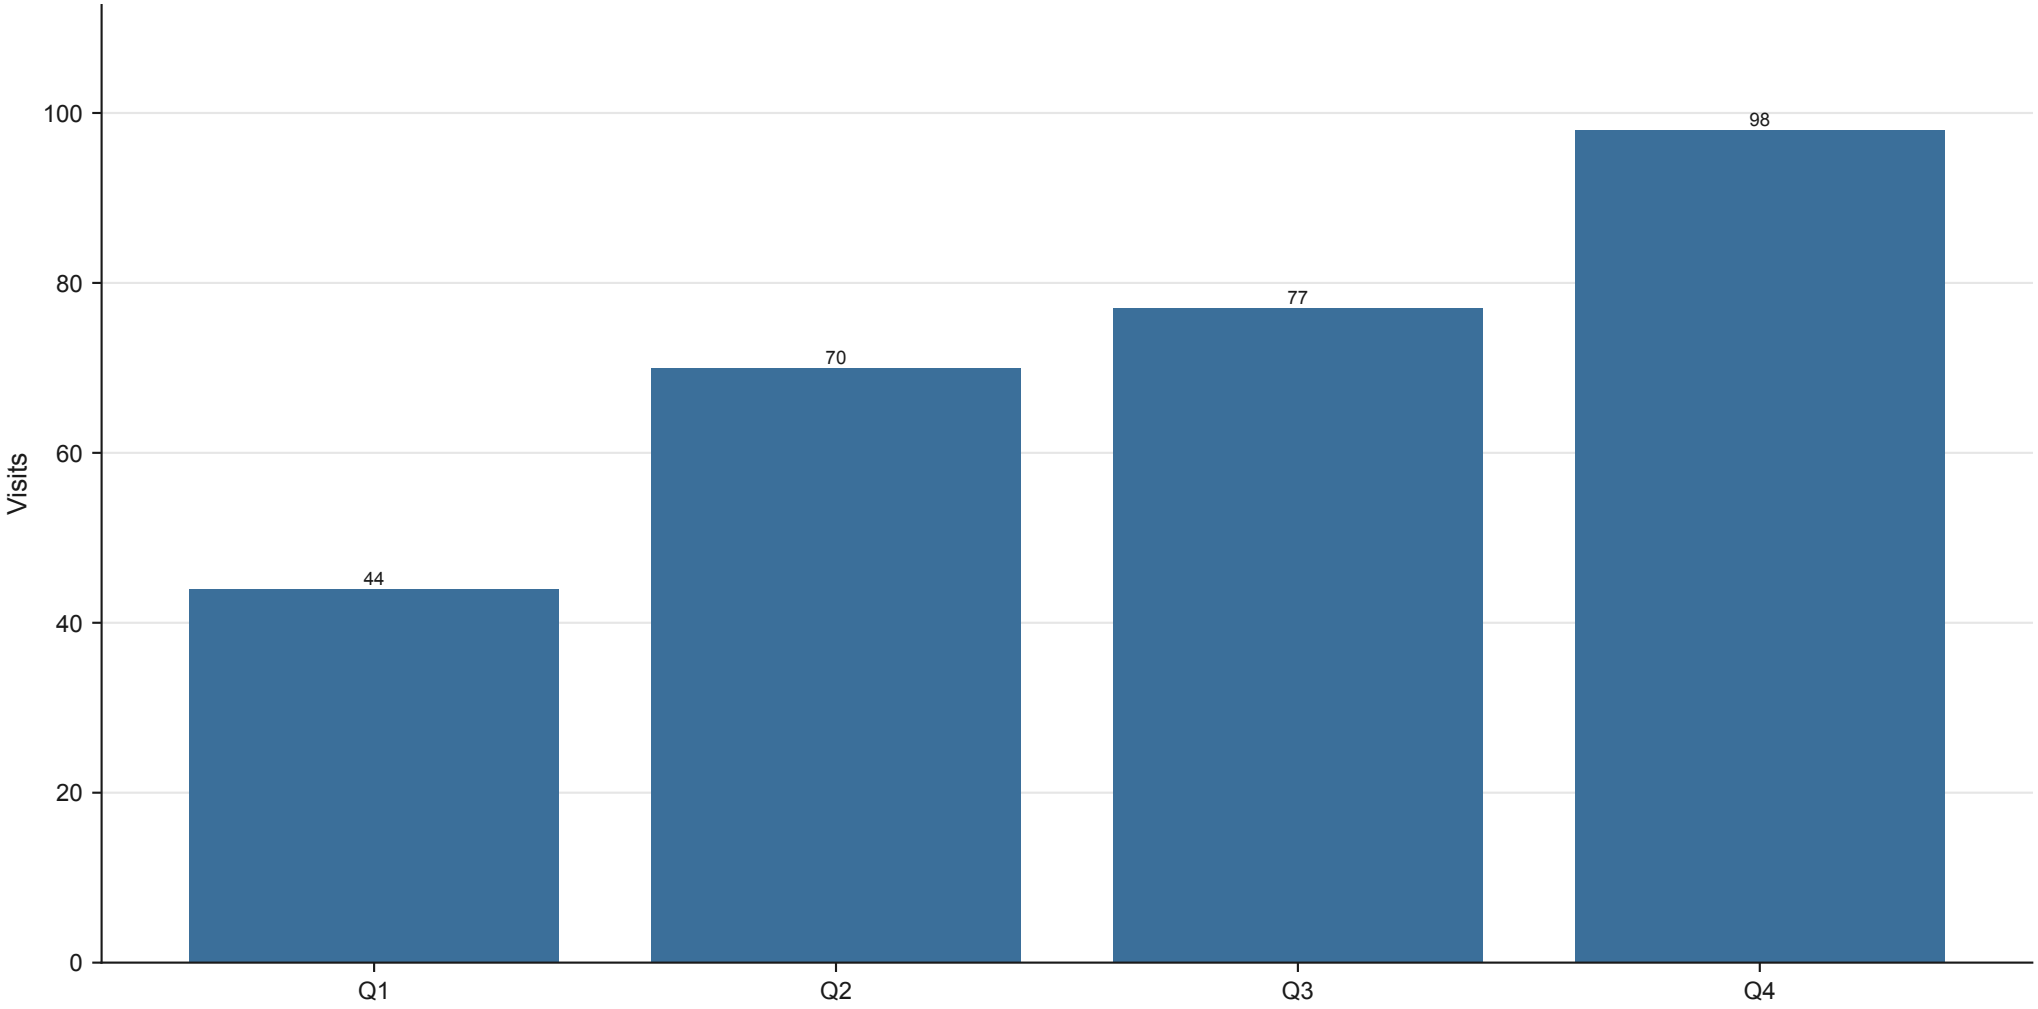

Put more associates on the peak month. That is when demo requests are already coming in.

MNL VISITS

Quarterly visits — where demo capacity is already tight

Q4 is the heaviest quarter in this file (98 visits, 34%). Quarters with no visits are omitted.

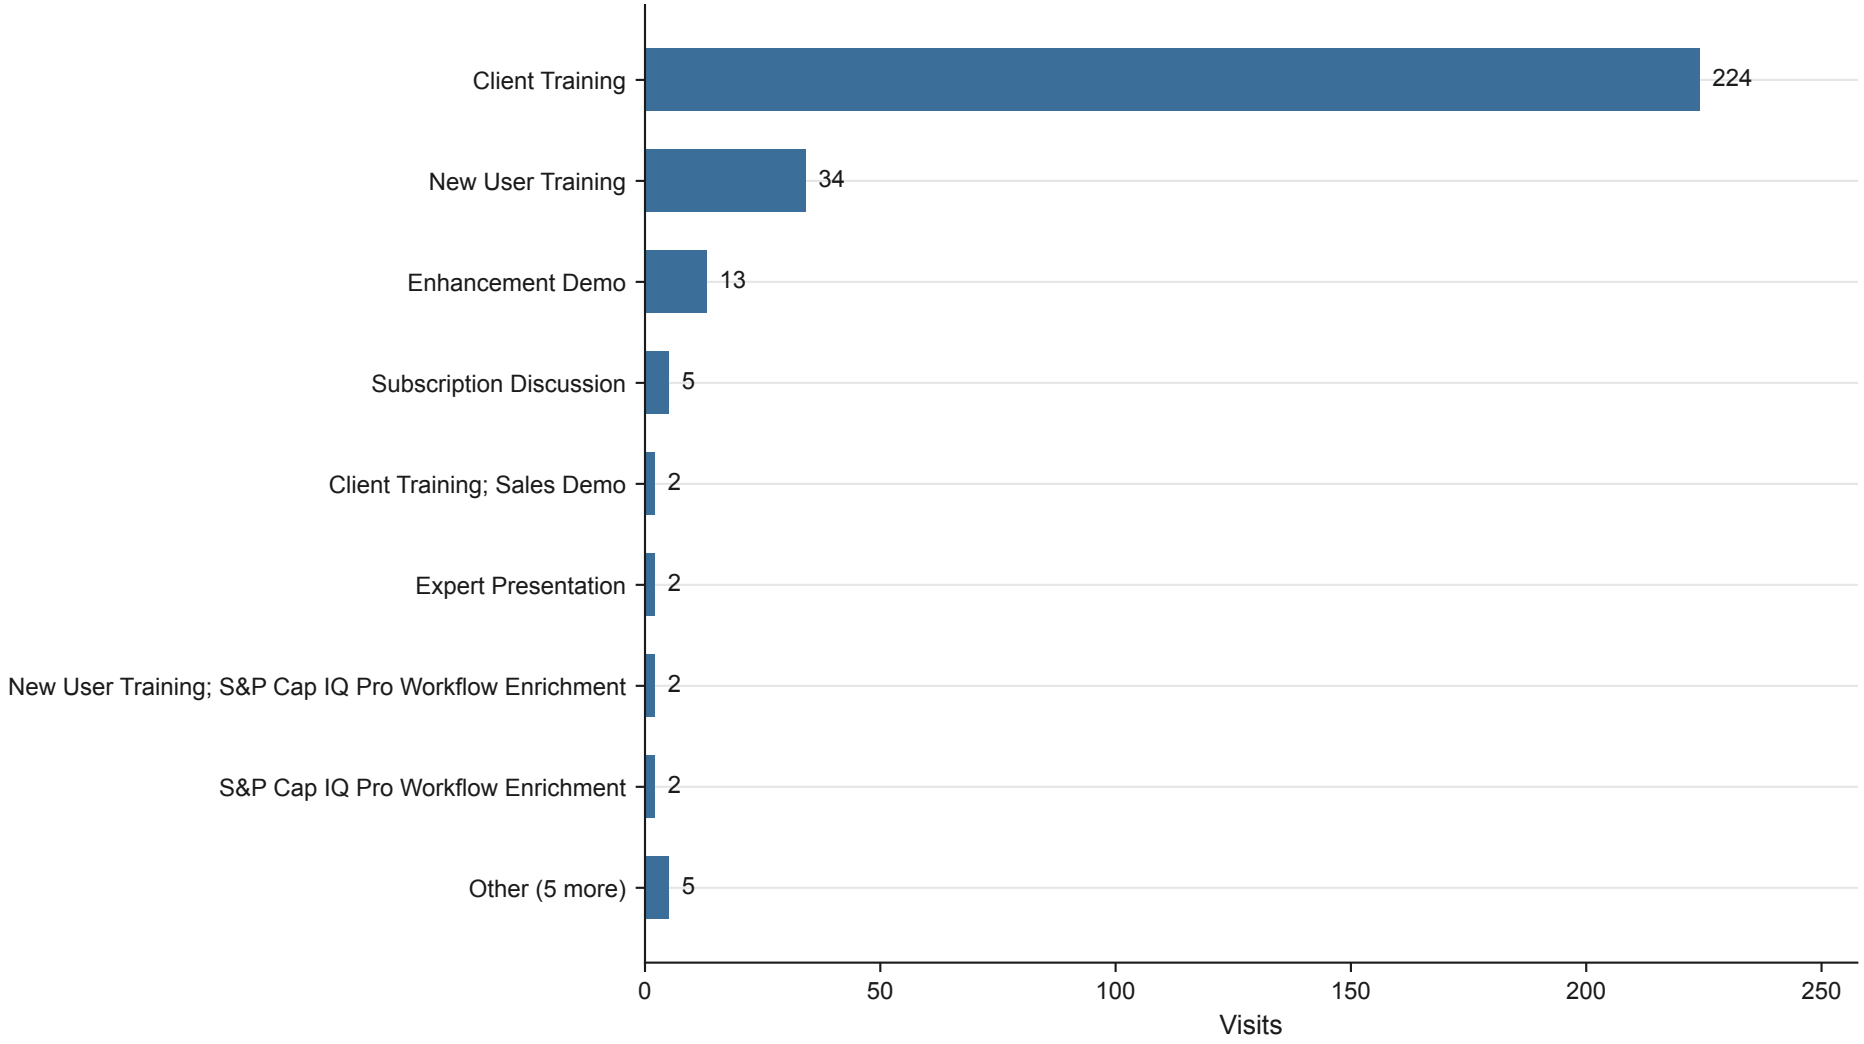

IMPLICATION

Cover the heavy quarter first. That is where the demo requests are.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Demonstration type — the session associates must be ready to run

Each bar is the Demonstration Type written on the visit. Combined selections stay as their own bar.

IMPLICATION

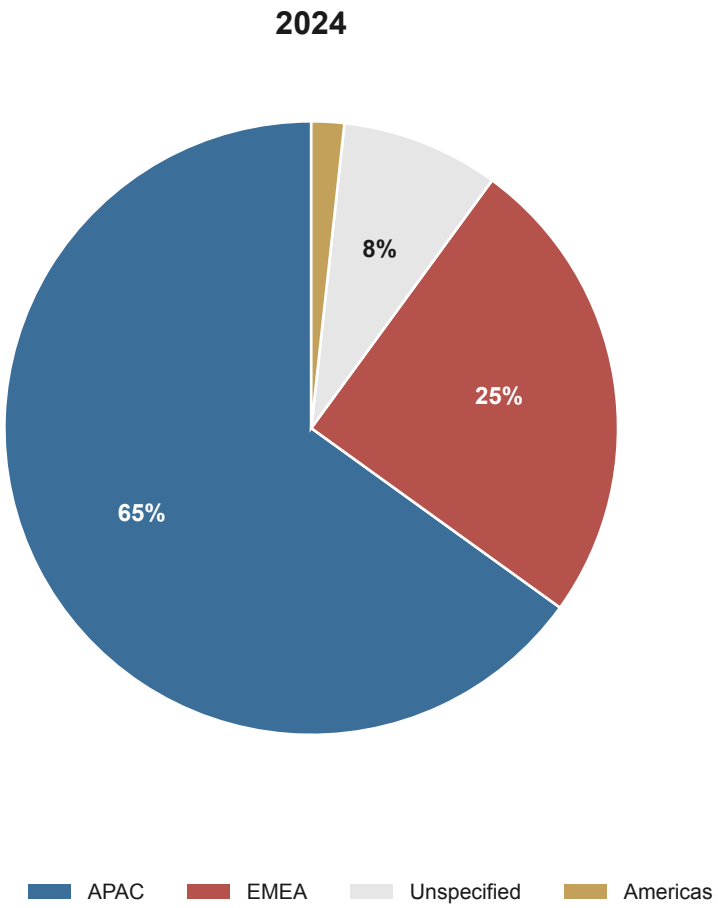

'Client Training' is 224 of 289 visits (78%). More associates who can run that session means more demo requests the team can accept.

MNL VISITS

Client region — where to aim demo coverage

Each slice is the share of logged demos. APAC is 188 of 289 visits (65%). Blank country: 24.

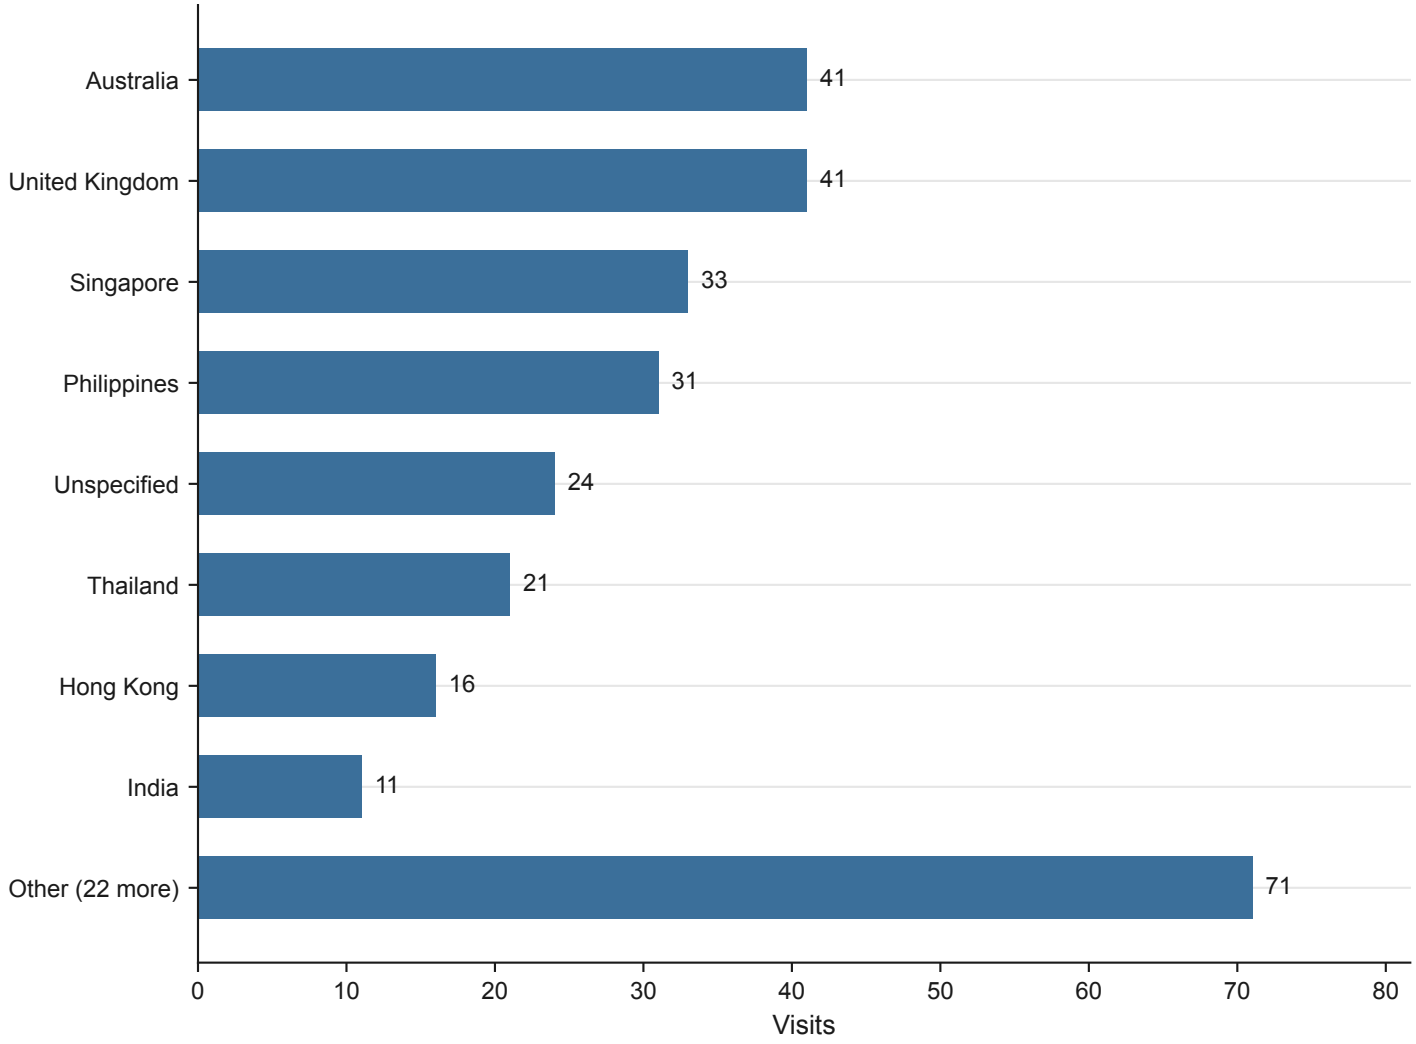

IMPLICATION

APAC shares Manila's business day, so take those training requests the same day. EMEA morning arrives in the Manila afternoon, so watch the queue after lunch for those training requests. Americas morning arrives in the Manila evening, so keep a later slot when those training requests come in.

Client country — which local examples to prepare

Top countries by logged demos. 24 visits have no country. The summary lists every country.

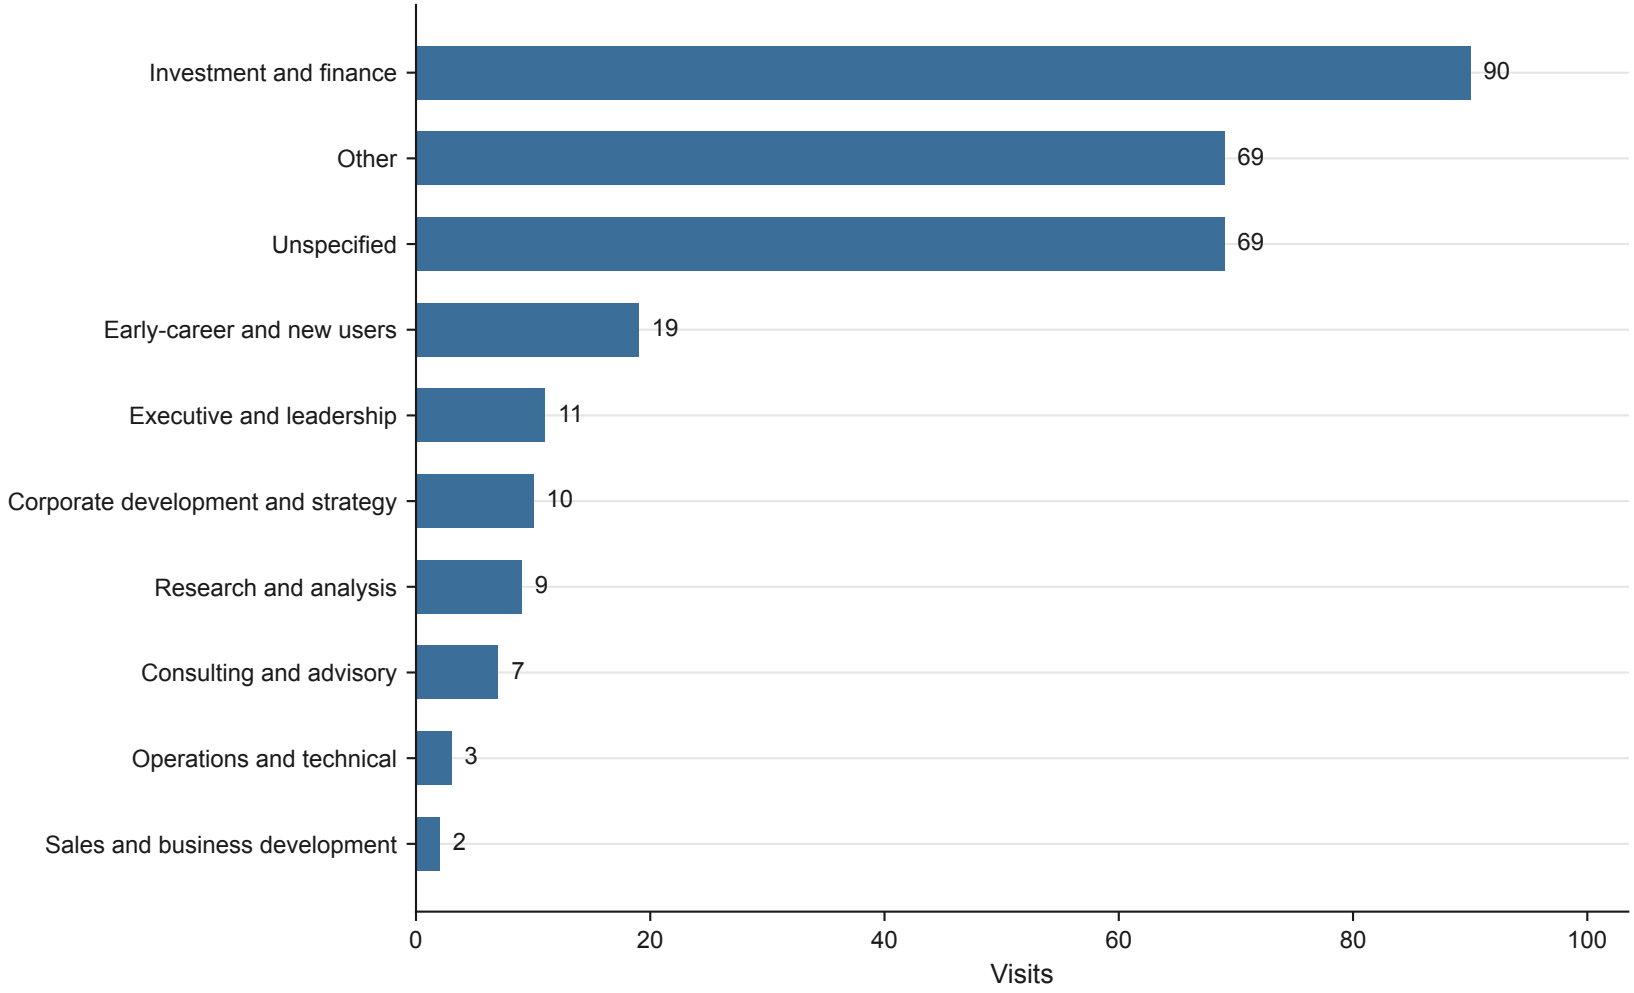

IMPLICATION

Australia is the most common country (41 visits, 14%). Use a local example from these countries so the client can see the next step and book again.

Client Profile: Job Description — who the associate will meet

The largest classified audience is Investment and finance (90). Other is 69 (24%) and Unspecified is 69 (24%). The role comes only from Team/User Job Description.

IMPLICATION

Train associates on the demonstration types this role books, so they know the client's workflow and can anticipate the queries and the solutions to show. 138 of 289 visits (48%) still have no usable job title.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Account concentration — relationships that can add the next demo

Asian Development Bank has the most visits (6, 2%). The five most visited named accounts are 24 visits (8%). 48 named accounts appear at least twice and 164 appear once. Blank Account: 0.

Top visit roles

- Investment and finance: 90 visits
- Other: 69 visits
- Unspecified: 69 visits
- Early-career and new users: 19 visits

Train associates on the demonstration types this role books, so they know the client's workflow and can…

Top accounts

- Asian Development Bank: 6 visits
- BDO Unibank, Inc.: 6 visits
- Apis Partners Group (UK) Limited: 4 visits
- Eastspring Investments (Singapore) Limited: 4 visits

Give a prepared associate to the accounts that already return. A known account is the fastest next demo.

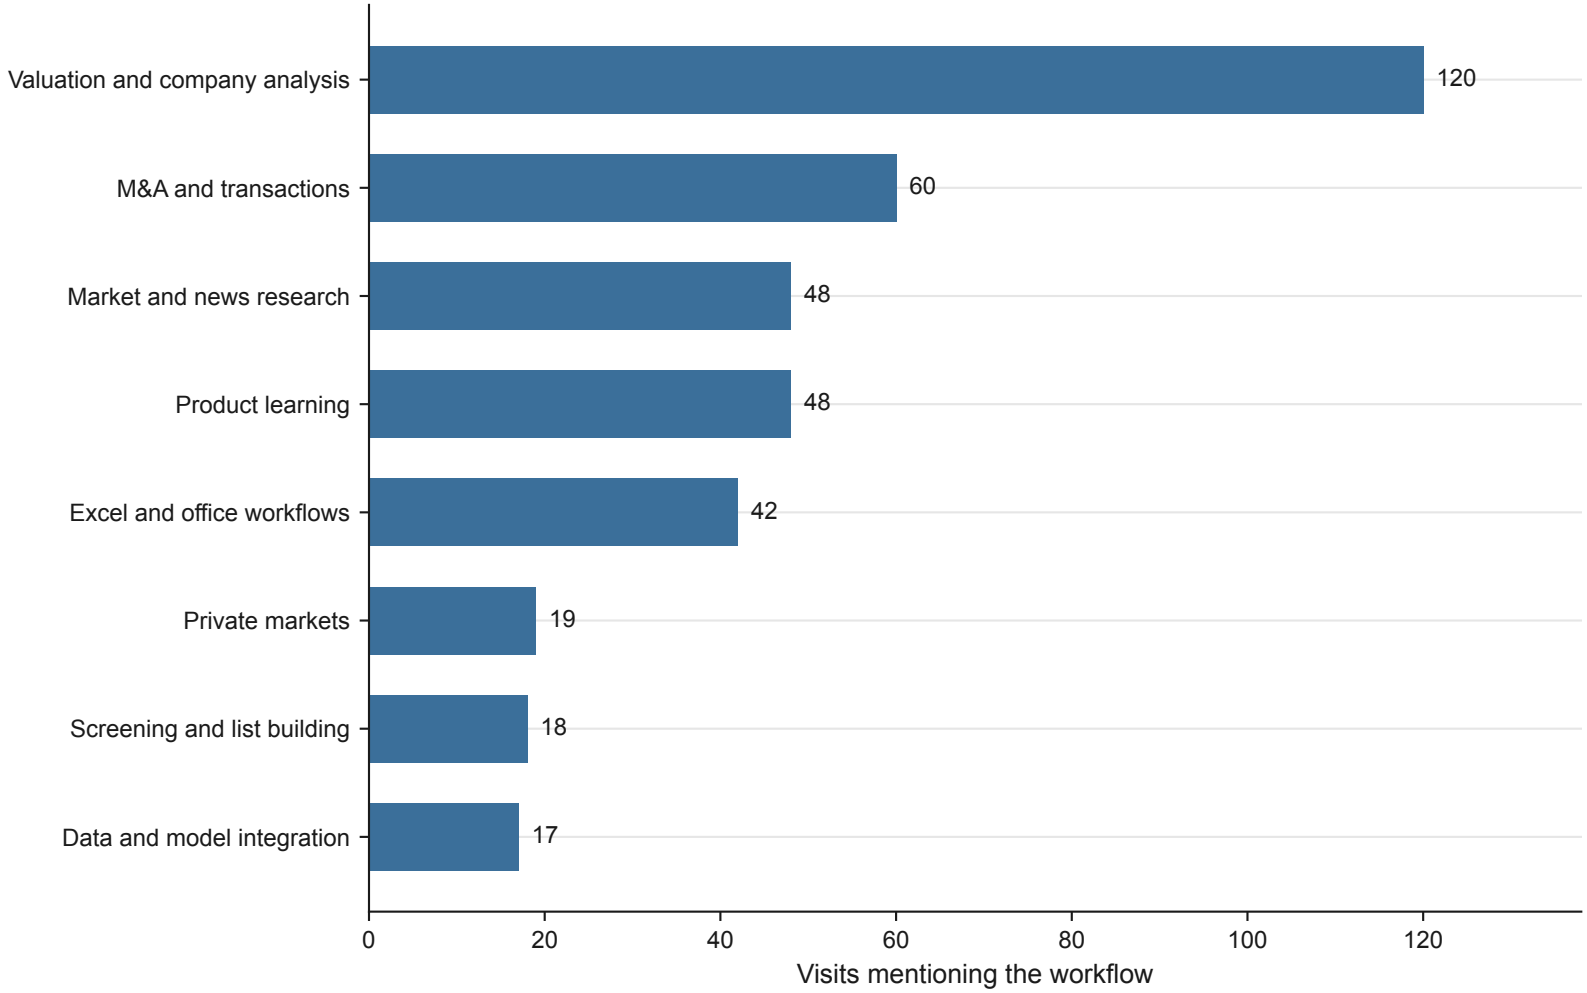

IMPLICATION

Before the next demo with Asian Development Bank (6 visits), brief the associate on the last demonstration type, the workflow, and the solution already shown. The room is usually Investment and finance. Continuing that conversation is how the return visit becomes another booked demo.

Key workflows — the product path to train before the call

Taken from Key Workflows, or Meeting Notes only when that field is empty. 105 of 289 visits have no classified workflow. One visit can appear in more than one bar.

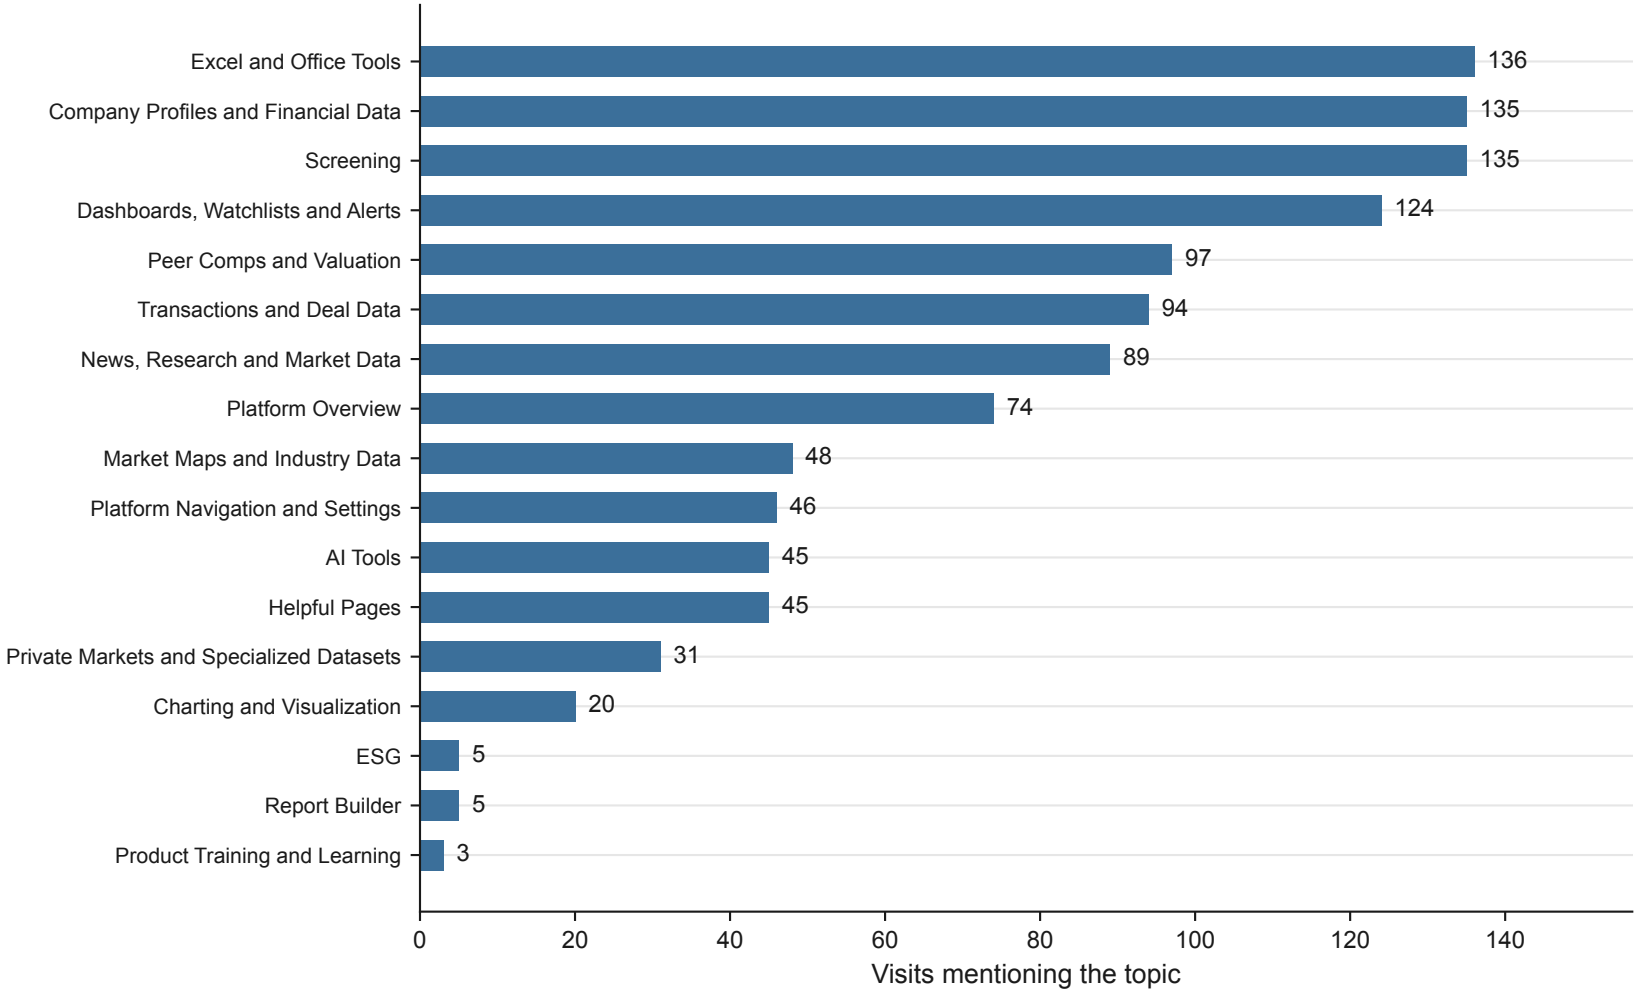

IMPLICATION

Start the demo on Valuation and company analysis (120 visits). Associates who can run that path can take the demo. Fill the blank workflow notes so the follow-up can be picked up.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Solution topics — modules to put in the standard demo

Every solution topic in Solutions Discussed, including AI Tools and the other datasets. 29 of 289 visits have no classified topic. One visit can match several topics.

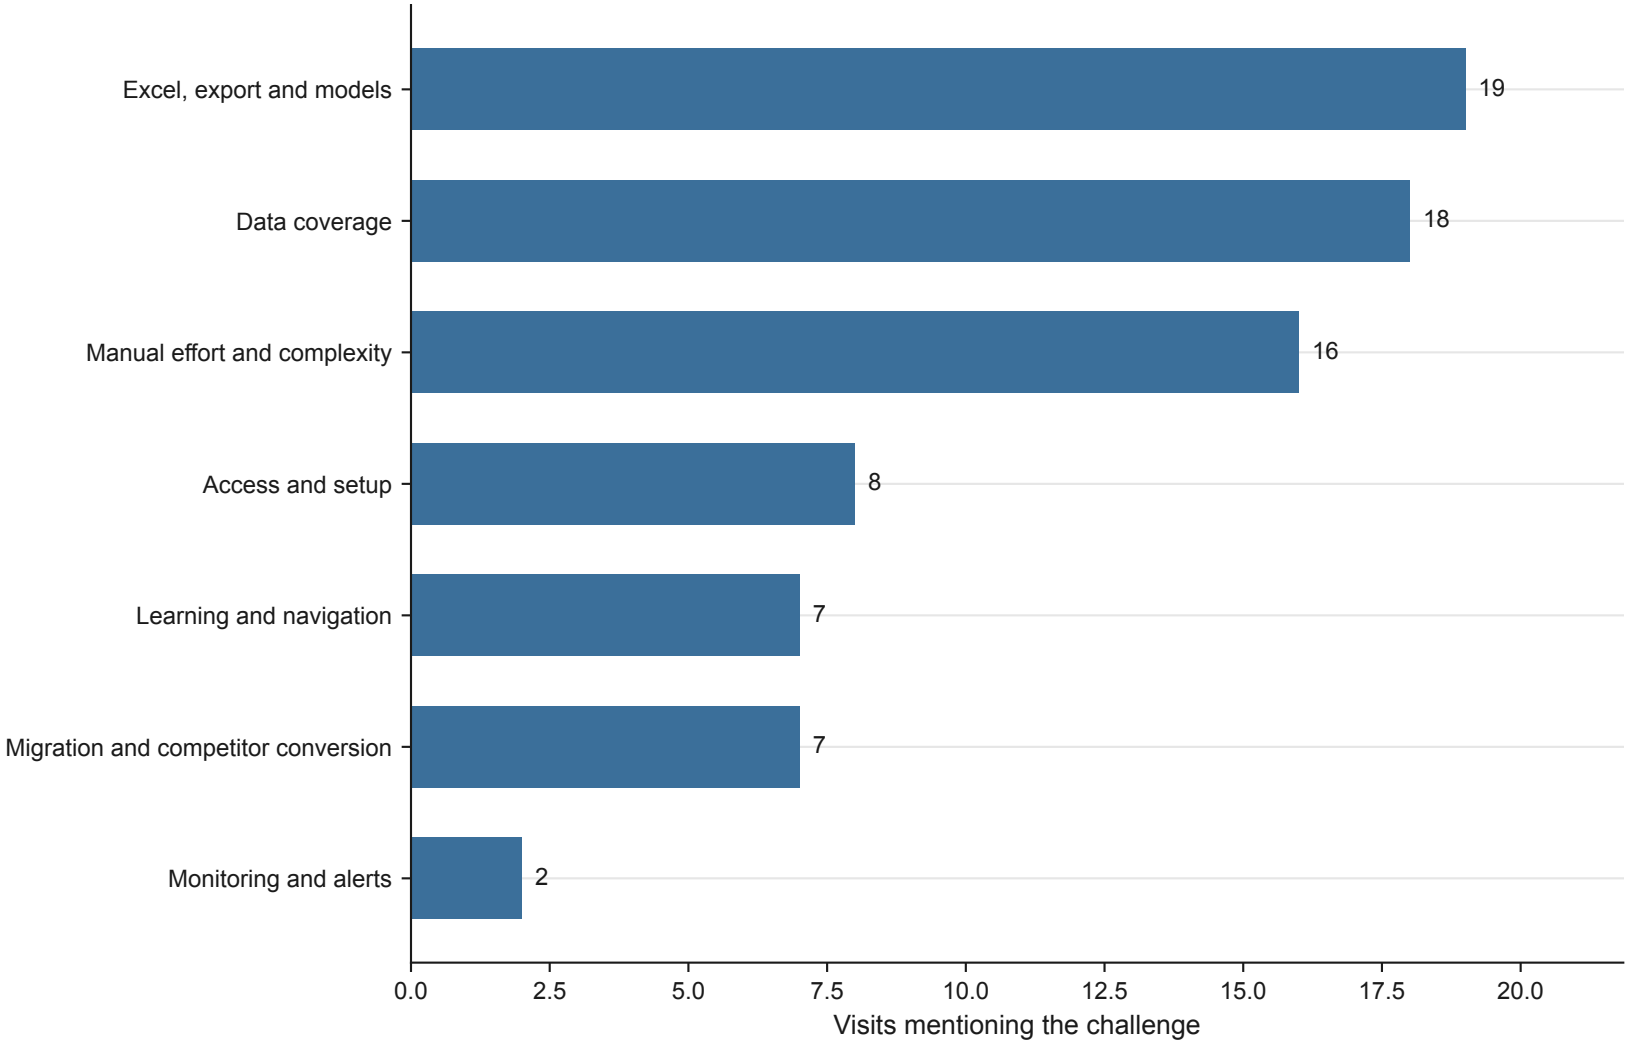

IMPLICATION

Train associates on Excel and Office Tools first (136 visits). AI Tools is in 45 visits, so include it with the other datasets on this page. Associates who can show these modules can take the next demo request.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Workflow challenges — what the associate should be ready to answer

203 of 289 visits have no challenge note. 31 notes matched no theme. One note can match more than one theme.

IMPLICATION

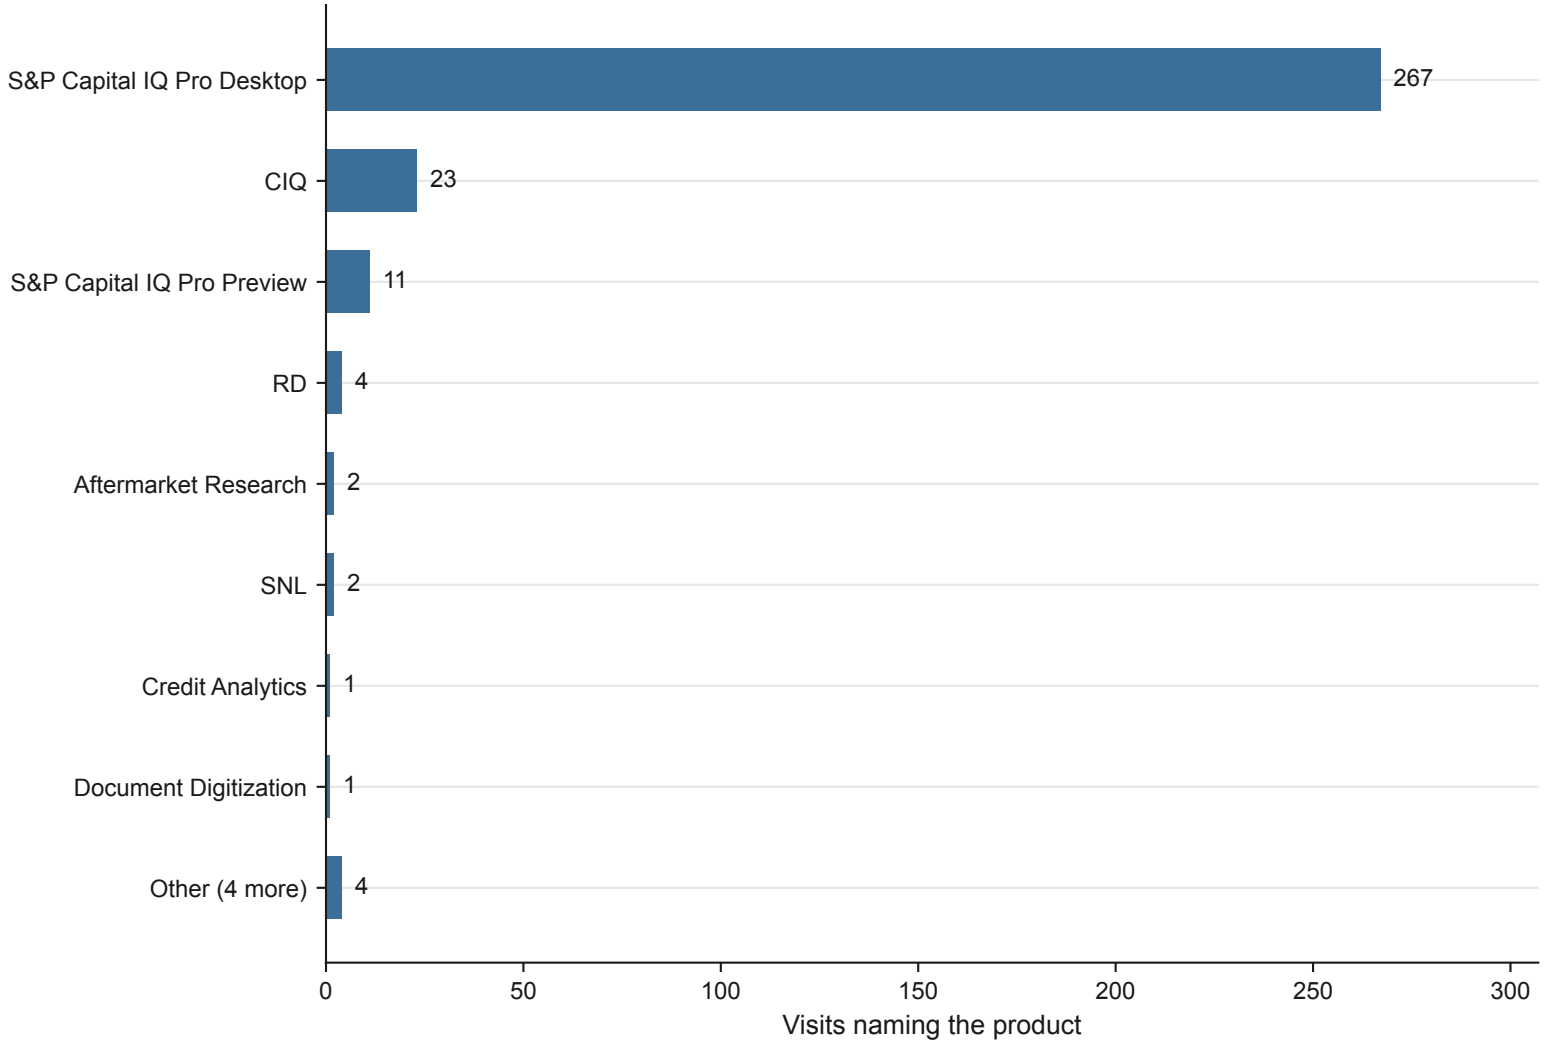

The most common matched barrier is Excel, export and models (19 visits). An associate who can answer that in the room is more likely to be asked back for another demo.

MNL VISITS

Products discussed — the desktop associates should know cold

Each product is counted once per visit. A visit that names two products is in both bars.

IMPLICATION

S&P Capital IQ Pro Desktop is named on 267 visits. Associates who can open the demo on that product can take the request.

Actions for the Manila team

What Manila can do with the 289 demos in 2024 to take more of the requests that come in.

1 Cover the hours training requests come in

APAC is 188 of 289 visits (65%). APAC shares Manila's business day, so take those training requests the same day. Associates on that window can accept the demo when the request arrives.

2 Train the bench on the modules clients ask to see

The visits center on Excel and Office Tools (136), and on Valuation and company analysis (120). AI Tools is in 45 visits. Associates who can show these can take the demo instead of handing it to one specialist.

3 Go back to accounts that already booked

18 named accounts have three or more visits. The top five are 24 of 289 visits (8%). Brief the associate on the last workflow and the solution already shown, so the return visit continues that conversation.

4 Have more associates ready for the session clients book

'Client Training' is 224 of 289 visits (78%). Practice that session until more of the bench can run it. More people who can run it means more demo requests the team can accept.

5 Write the workflow down so someone else can take the follow-up

105 visits have no workflow. Fill Key Workflows before the visit is closed. Another associate can then take the next demo from the last conversation.
