What 576 logged demos tell Manila

Where to add associate capacity, what to product-train, and which accounts can book the next demo.

LOGGED DEMOS

289

2024

LOGGED DEMOS

220

2025

LOGGED DEMOS

67

2026 (January–June)

Set the next demo target on the months every year contains. FH1 2026 is January–June, so it is not a full year of lost demand.

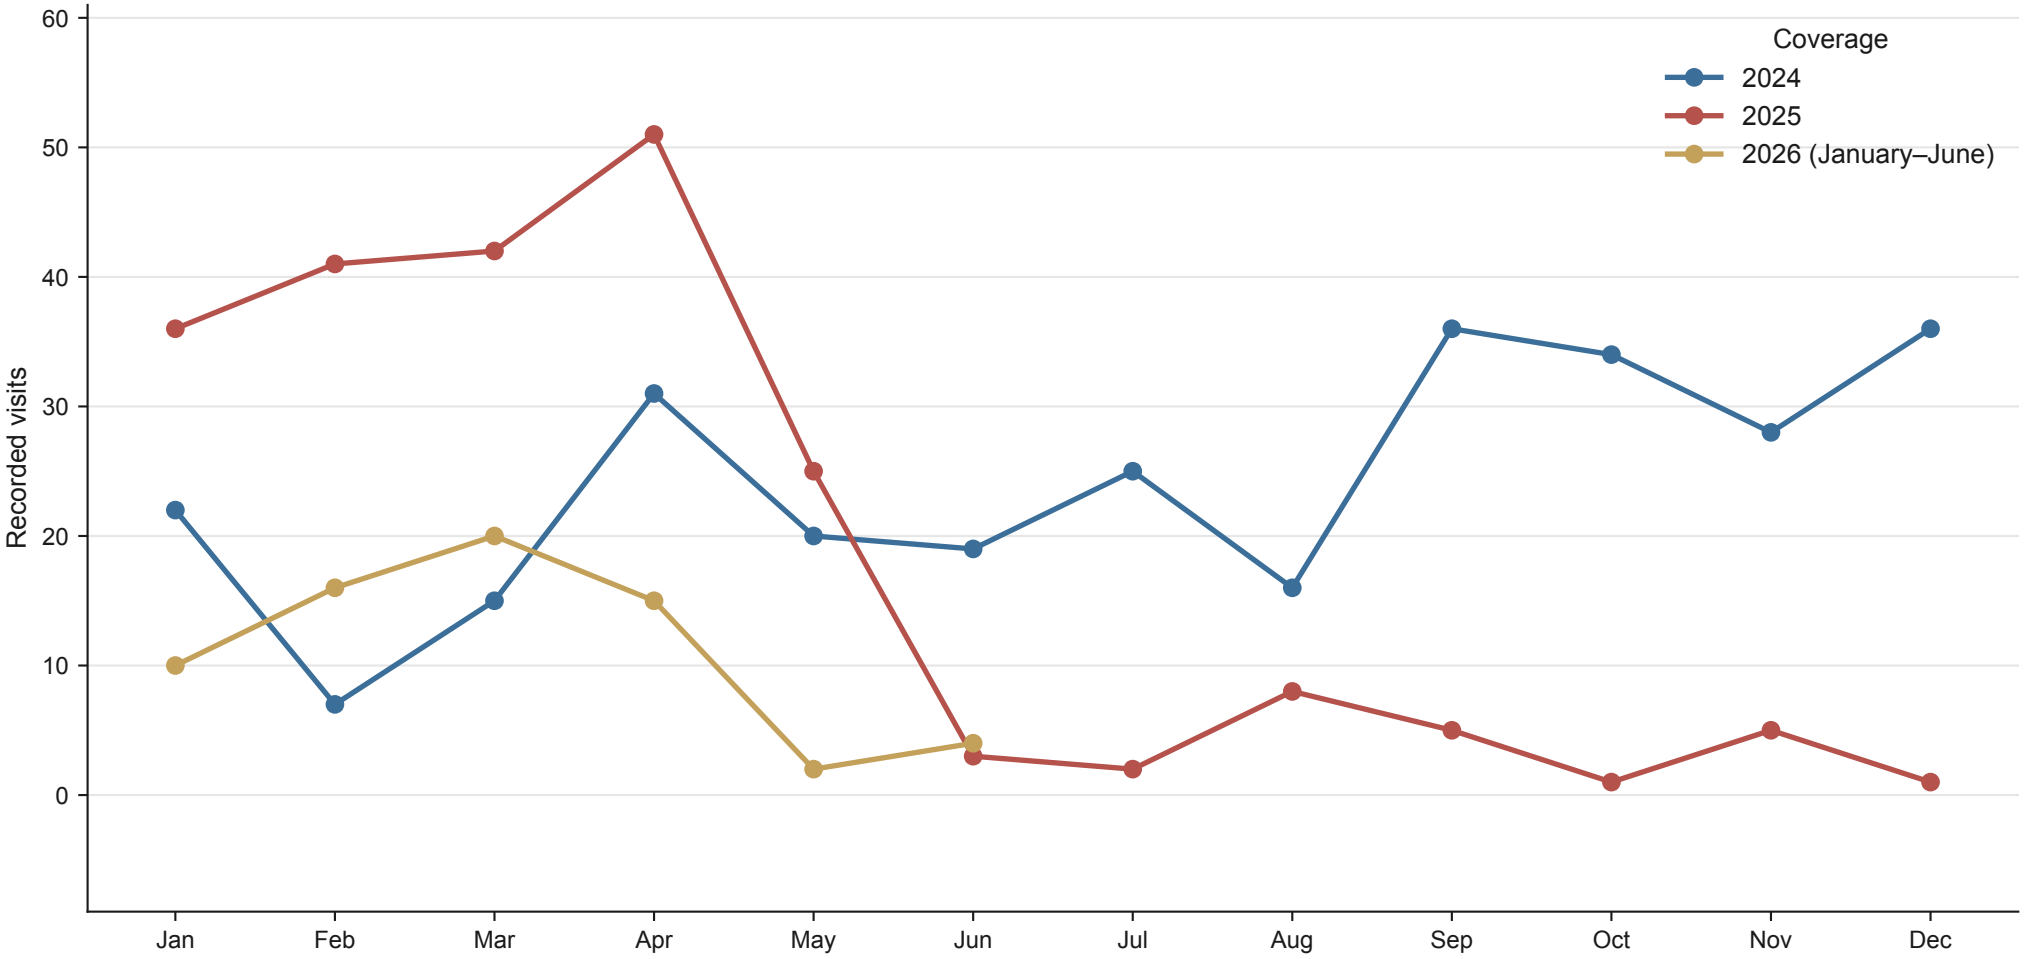

Each row is one logged demo. A repeat account is the fastest way to add the next one.

MNL VISITS

Monthly visits — when to roster associates for demos

Dated visits are 289 in 2024 (January–December); 220 in 2025 (January–December); 67 in 2026 (January–June). Each line is one year, and a month with no visits in that year is not drawn.

IMPLICATION

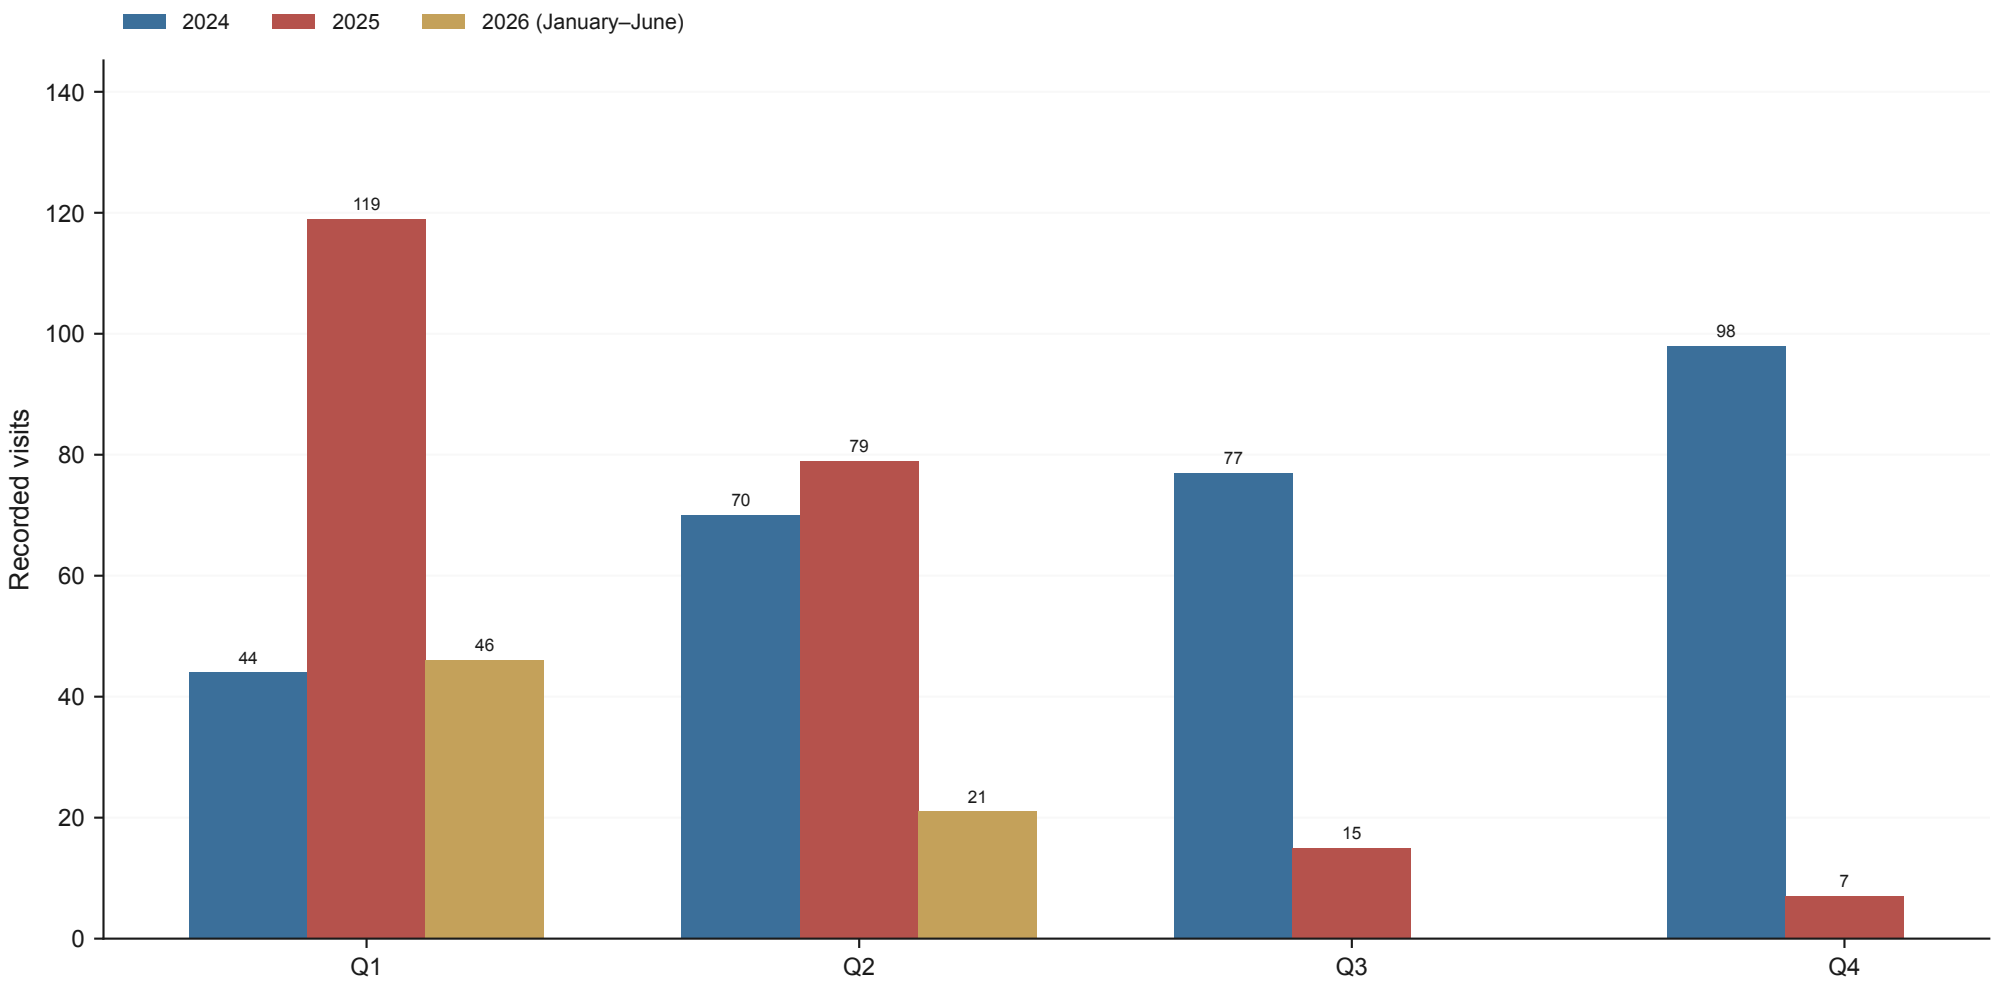

Roster more associates in the months the line is high. That is when clients are requesting demos. Use the lighter months to train the bench on the workflows and solutions those demos require.

MNL VISITS

Quarterly visits — where demo capacity is already tight

Recorded visits by quarter are 2024: Q1 44, Q2 70, Q3 77, Q4 98; 2025: Q1 119, Q2 79, Q3 15, Q4 7; 2026: Q1 46, Q2 21.

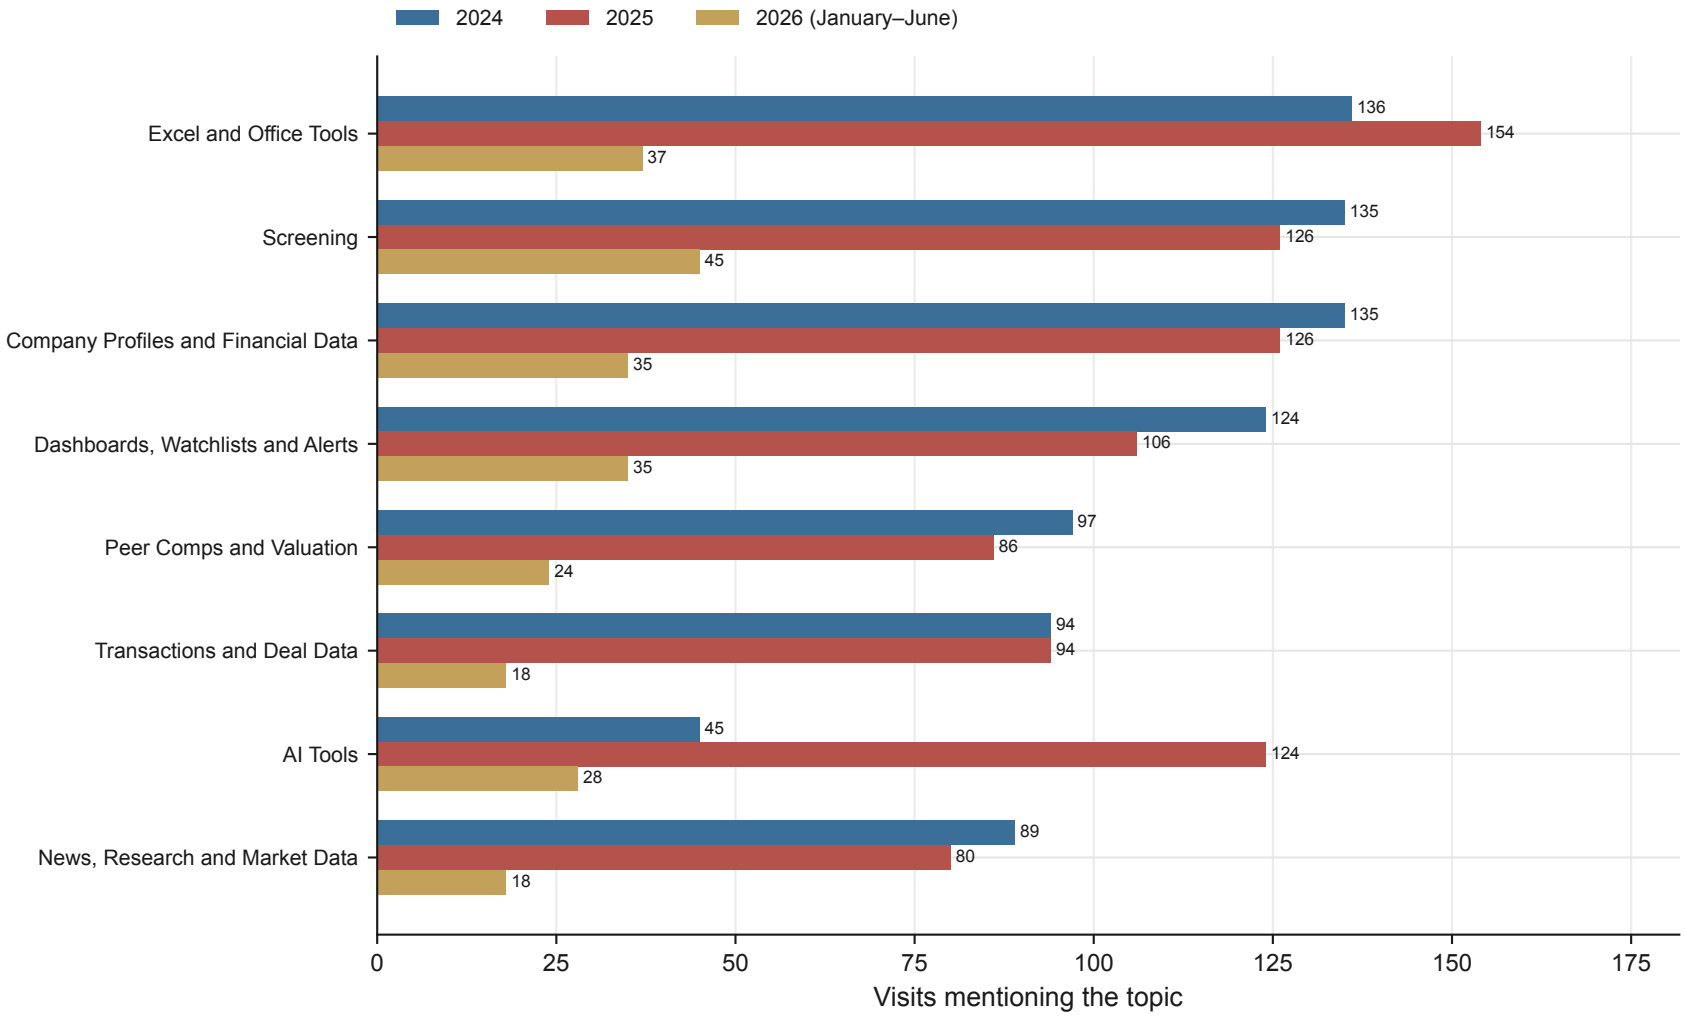

IMPLICATION

Put the bench on the heavy quarter, when demo requests are already booked. Use the lighter quarter to train associates on the workflows and solutions they will need when the next heavy quarter arrives.

Solution topics — modules to put in product training

The eight solution topics clients ask to see most often, including AI Tools. One visit can match more than one topic.

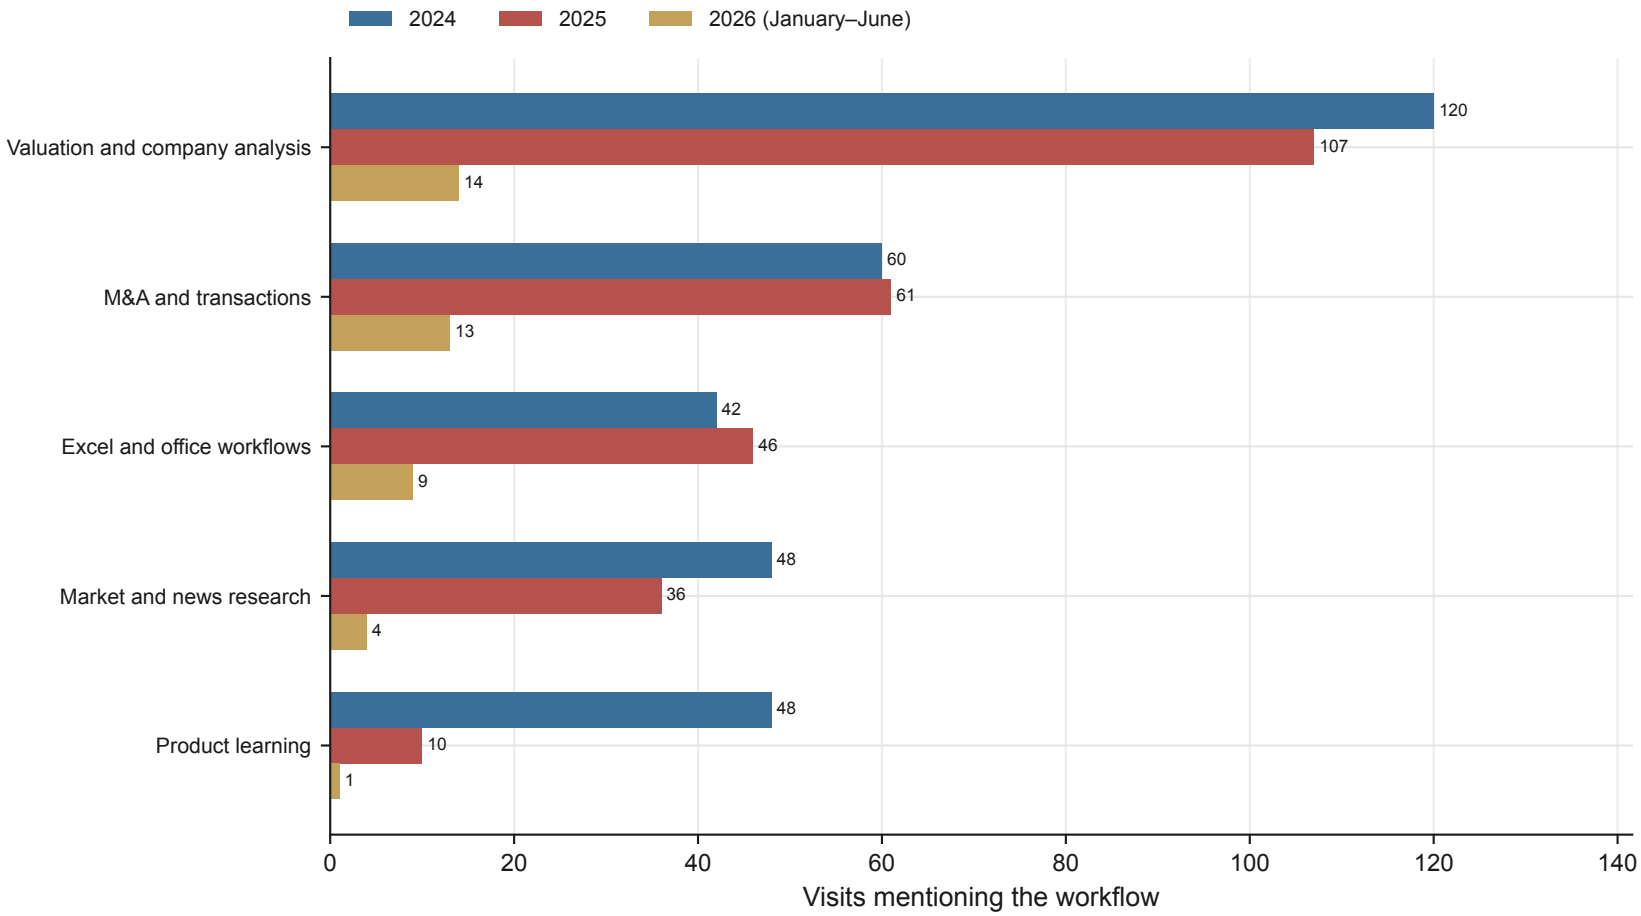

IMPLICATION

Train associates on these modules, starting with Excel, Screening, and company data, and include AI Tools (2024: 45; 2025: 124; 2026: 28). When the client's workflow calls for transactions, peer comps, dashboards, or news, the associate should be able to open that solution in the same demo.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Key workflows — the product path to rehearse before the call

Among visits with a classified workflow, the leading theme was 2024: Valuation and company analysis (120); 2025: Valuation and company analysis (107); 2026: Valuation and company analysis (14). Job titles are not used to assign the workflow.

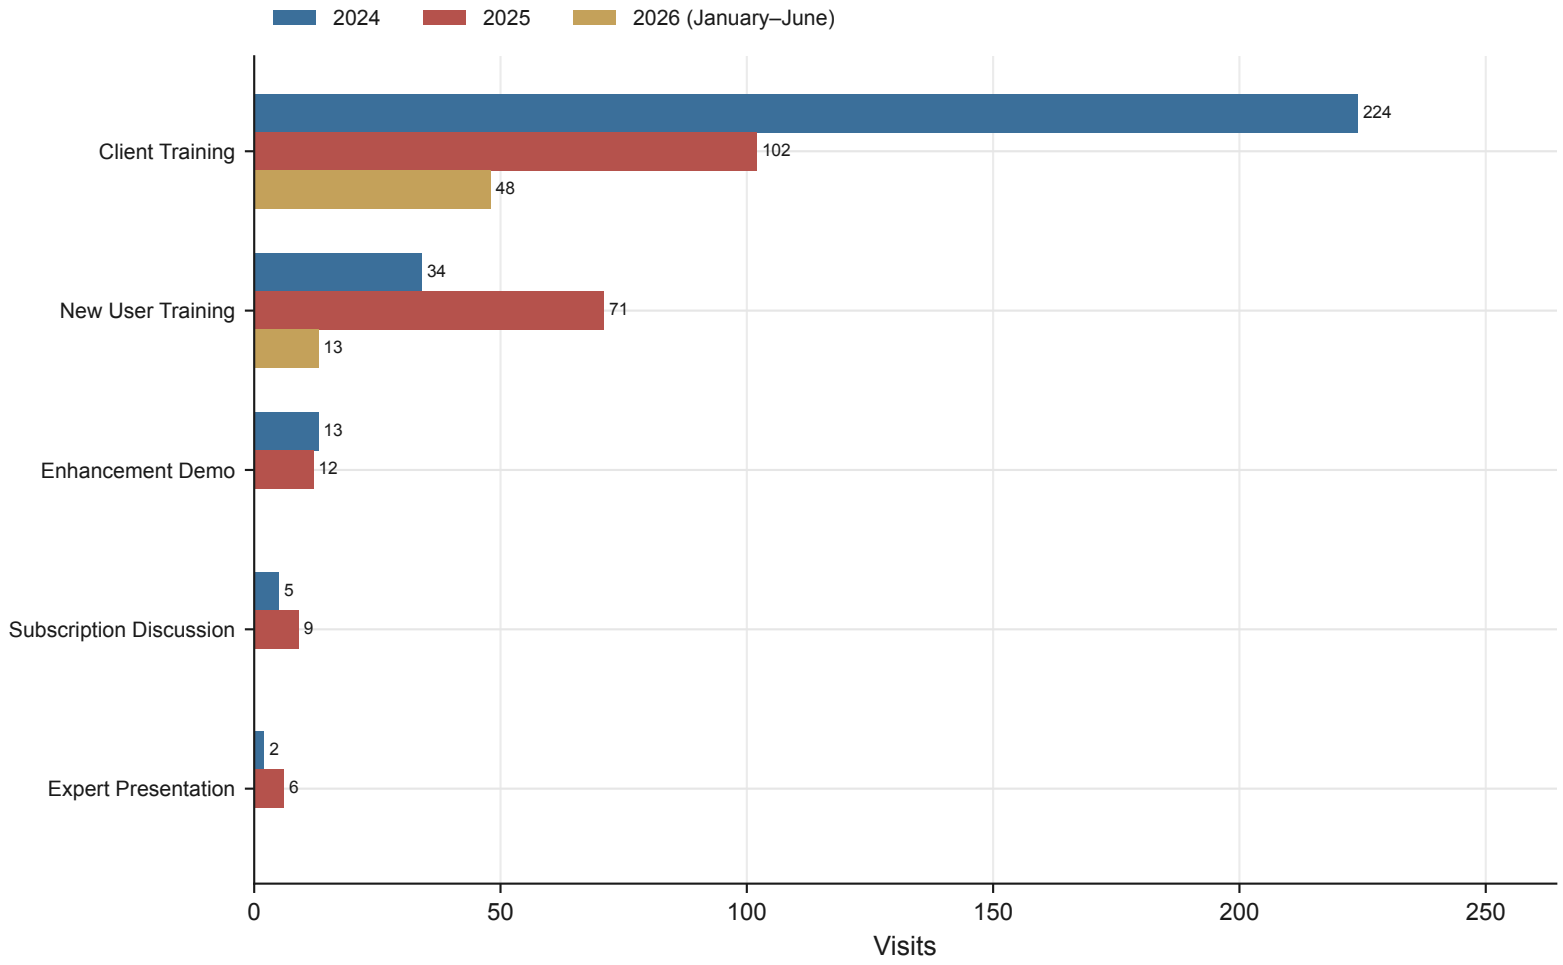

IMPLICATION

Walk associates through valuation and company analysis, and through M&A, including the questions clients usually ask. They can then show the solution in the demo instead of stopping to find a specialist.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Demonstration type — the session associates must be ready to run

The chart uses the original Demonstration Type text, including combined selections. The most frequent selection was 2024: Client Training (224); 2025: Client Training (102); 2026: Client Training (48).

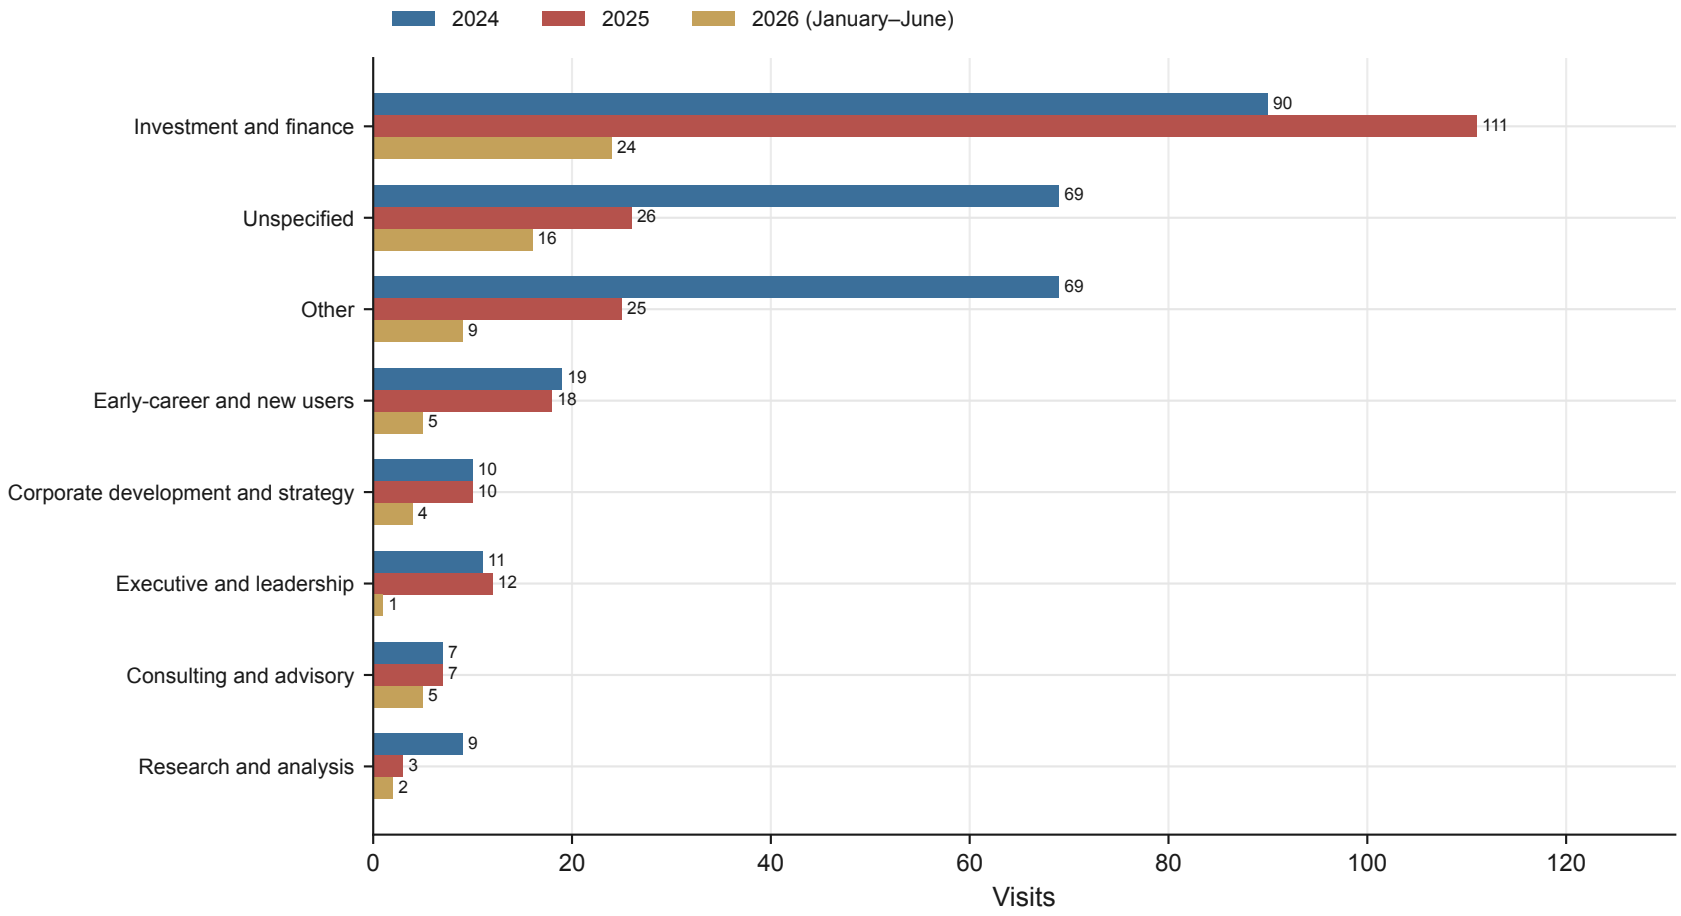

IMPLICATION

Client Training is the session these clients book. Train associates to run it against the client's workflow, so they can anticipate the questions and show the solution in the same demo.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Job description — who will be in the room

The largest classified job family in each year was 2024: Investment and finance (90); 2025: Investment and finance (111); 2026: Investment and finance (24). Other and Unspecified stay on the chart because they are part of the audience record.

IMPLICATION

Train associates on the demonstration types these roles book, so they know the client's workflow and can anticipate the queries and the solutions to show. Investment and finance is that room in every year.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Top visit roles — who the associate will meet

The three roles with the most logged demos in each year. Unspecified and Other are visits without a usable job title.

2024

1. Investment and finance — 90 visits
2. Other — 69 visits
3. Unspecified — 69 visits

2025

1. Investment and finance — 111 visits
2. Unspecified — 26 visits
3. Other — 25 visits

2026 (January–June)

1. Investment and finance — 24 visits
2. Unspecified — 16 visits
3. Other — 9 visits

IMPLICATION

Investment and finance is the client in the room every year. Train associates on Client Training and on valuation and company analysis, so they know that workflow and can anticipate the queries and the solutions to show. Where the role is Unspecified or Other, get the job title before the demo.

Source: FY2024, FY2025, and FH12026 Manila CIQ CS Visit Reports

Top accounts — where the next demo can come from

The three named accounts with the most logged demos in each year.

2024

1. Asian Development Bank — 6 visits
2. BDO Unibank, Inc. — 6 visits
3. Apis Partners Group (UK) Limited — 4 visits

2025

1. Revaia SAS — 4 visits
2. Apis Partners Group (UK) Limited — 3 visits
3. PT Inertia Utama — 3 visits

2026 (January–June)

1. Oxera Consulting LLP — 3 visits
2. Swedfund International AB — 3 visits
3. Arc Group Securities LLC — 2 visits

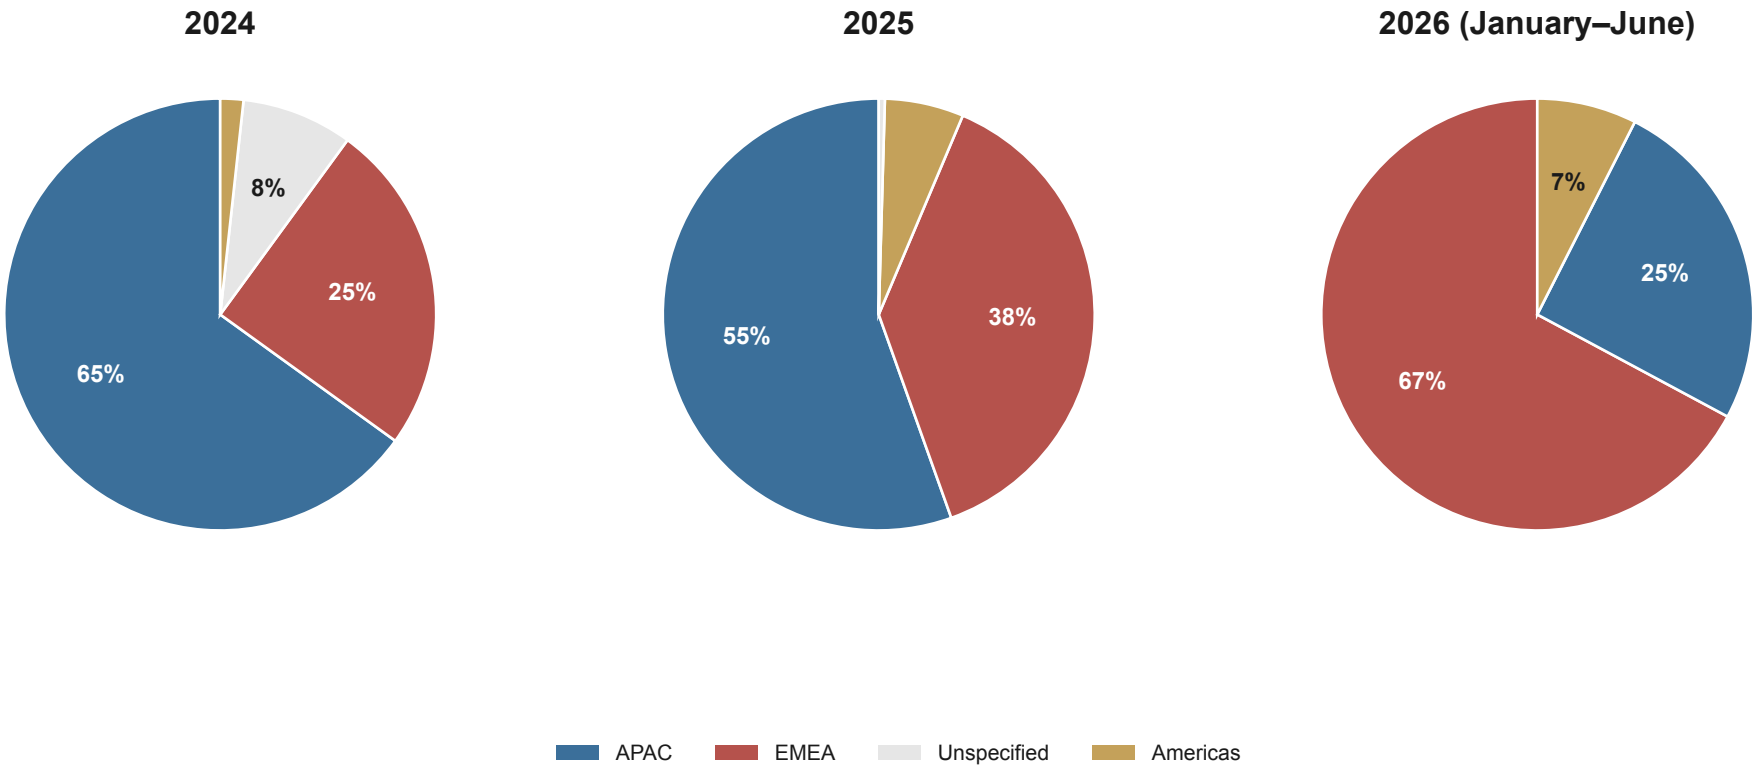

IMPLICATION

Before the next demo, brief the associate on the last demonstration type, workflow, and solution shown to that account. Asian Development Bank and BDO Unibank led 2024, Apis Partners returned in 2024 and 2025, and the first half of 2026 is led by Oxera, Swedfund, and Arc Group.

Client region — where to aim demo coverage

The leading region was 2024: APAC (188) of 289 (65%); 2025: APAC (122) of 220 (55%); 2026: EMEA (45) of 67 (67%).
Blank countries are Unspecified and are not assigned to a region.

IMPLICATION

Where the requests came from — 2024, 2025: APAC; 2026 (January–June): EMEA. EMEA morning arrives in the Manila afternoon, so watch the queue after lunch for those training requests.

How Manila should use these records

What the files cover

These files contain 576 dated visits (289 in 2024, 220 in 2025, 67 in 2026 (January–June)). A row is one logged visit, not one unique client. The export has no prospect list, invitation count, or booking outcome.

What a demo target can use

Roster associates to the heavy months and product-train them on the leading session type. A lower total is not, by itself, lost demand, because these files do not show declined demos. Compare FH1 2026 only with the same months in earlier years when setting the next demo target.

How the themes were read

Solution topics come only from Solutions Discussed. Workflows come from Key Workflows, or from Meeting Notes when Key Workflows is blank. Roles come from Team/User Job Description. Demonstration type is the value selected on the visit. Challenges come from Workflow Challenges and Consequences of living without Solution.

How to act on a chart

Train associates on the leading bar first. One visit can match more than one topic, so the bars are not competing audiences. A blank workflow or challenge note is a demo the next associate cannot prepare for. Require both fields at close.

Actions for the Manila team

What Manila can do with these 576 logged demos to take more of the requests that come in.

1 Count demos on the months every file contains

January–June logged demos are 2024: 114; 2025: 198; 2026: 67. Use that window when setting how many demos Manila should take next. APAC shares Manila's business day, so take those training requests the same day.

2 Train the bench on the modules clients ask to see

The visits center on Excel and Office Tools (327), and on Valuation and company analysis (241). AI Tools is in 197 visits. Associates who can show these can take the demo instead of handing it to one specialist.

3 Go back to accounts that already booked

33 named accounts have three or more visits. The top five are 33 of 576 visits (6%). Brief the associate on the last workflow and the solution already shown, so the return visit continues that conversation.

4 Have more associates ready for the session clients book

'Client Training' is 374 of 576 visits (65%). Practice that session until more of the bench can run it. More people who can run it means more demo requests the team can accept.

5 Write the workflow down so someone else can take the follow-up

220 visits have no workflow. Fill Key Workflows before the visit is closed. Another associate can then take the next demo from the last conversation.
